LONG WALL LIGHT INSTALLATION GUIDE

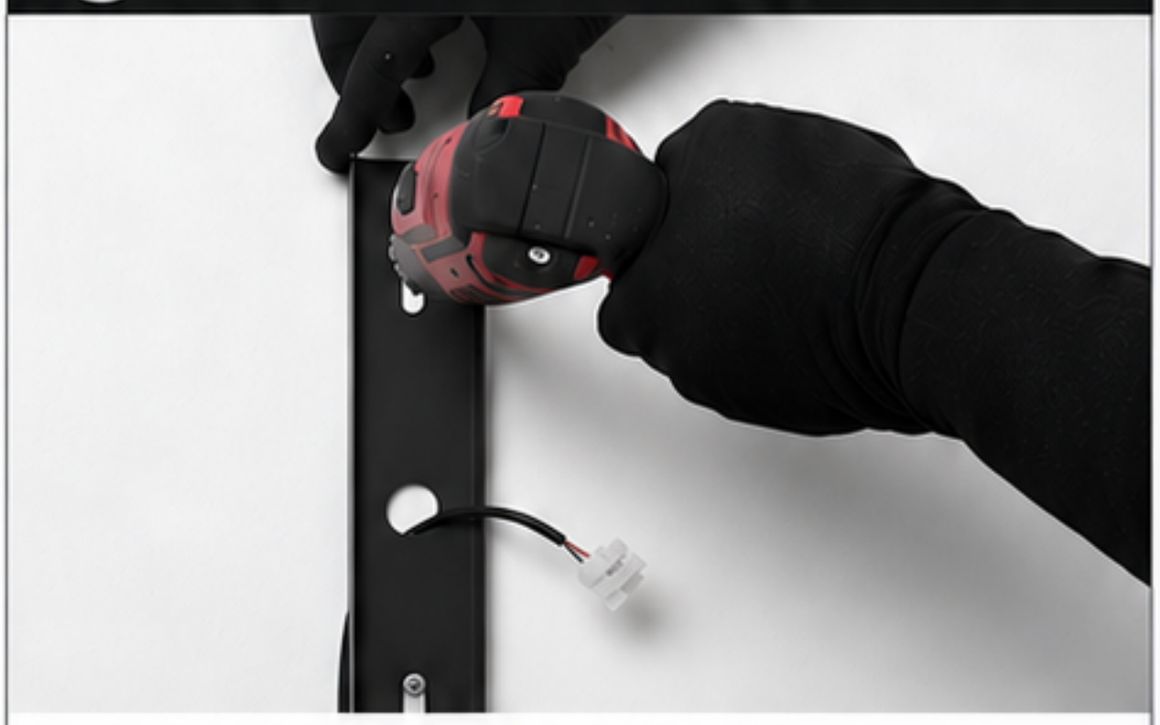

Professional installation by a qualified electrician is recommended.

1 What's in the Box

Wall light body, mounting bracket, screws, remote control, and user manual.

2 Secure the Mounting Bracket

Place the bracket at the installation spot and fasten it securely with screws.

3 Connect the Wires

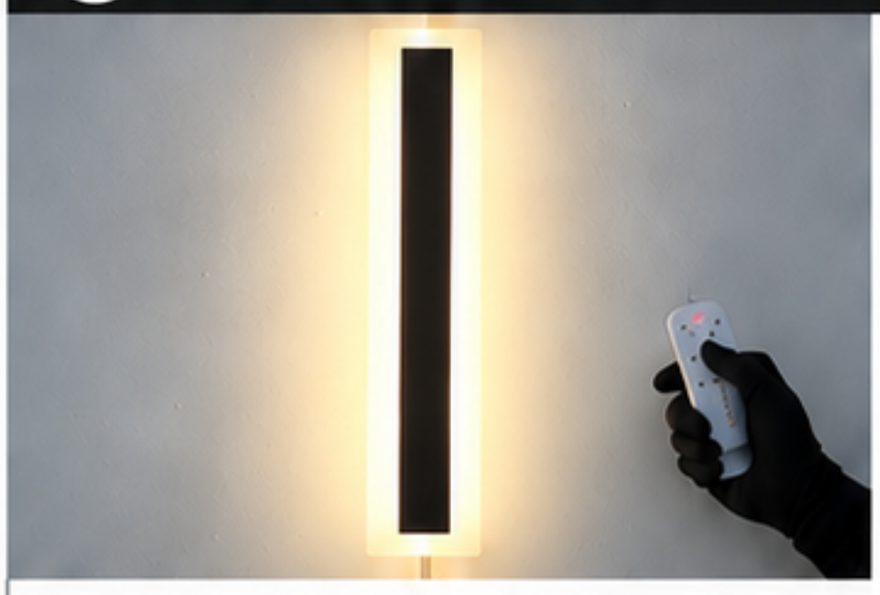

Turn off the power. Match the wires correctly, then insulate and protect the connections.

4 Attach the Light to the Bracket (4 Screws)

Align the light with the bracket and secure it with 4 screws.

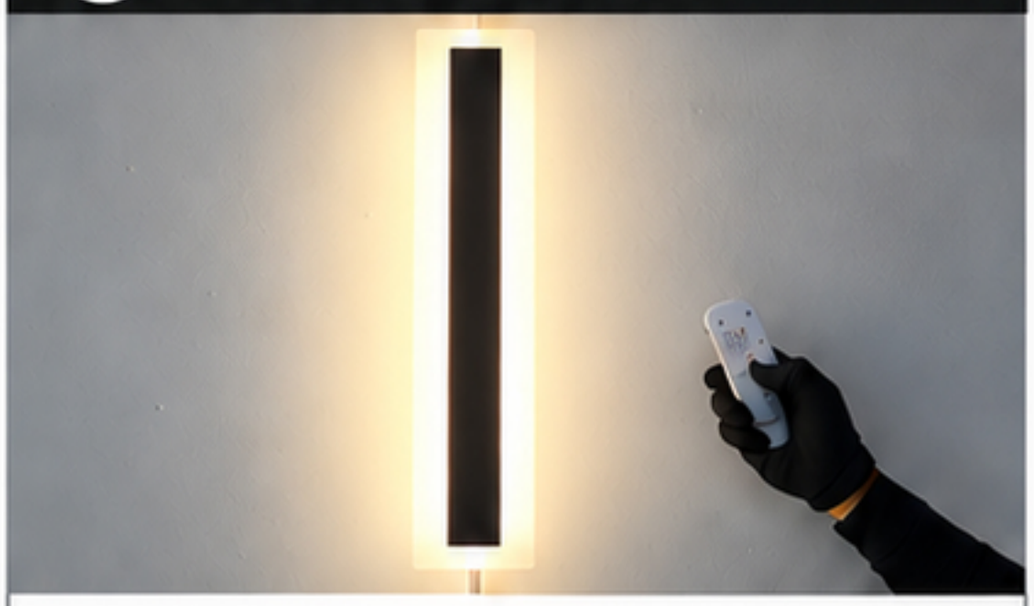

5 Pair the Remote

Within 5 seconds of turning on the light, press and hold the SETUP button for 5–10 seconds. The light will flash when pairing is complete.

6 Finish Installation

Make sure the light is secure and turns on properly.

⚠ Safety Notes

- Turn off the power before installation.
- Make sure all wire connections are secure and insulated.
- Do not install or remove the fixture while the power is on.

Gray Wire (Remote Signal): Do not connect or cut the gray wire, as it will disable the remote control function.
